County chopper to face nominations

IT WILL BE neither a happy Christmas nor a bright New Year for High Wycombe and District Show Association unless, quickly, there are firm guarantees against the possibility of further financial loss if—and it's a big if—its 177th annual meeting of the association, held at the Irish Club on Thursday, members reluctantly but realistically decided 'No show in 1977 unless guarantees are forthcoming, to the satisfaction of the general purposes and finance committee, by January 10.'

How sweet!

Next Week's Mid-week

YOUR next Mid-week will be out lunch-time on Monday. Will all advertisers and correspondents help by forwarding their copy by noon on Friday.

THE BOGEY of sackings, avoided for the last two years by Bucks County Council, became a reality this week after Government warnings on cuts and the bombshell news that Bucks could have lost over £4 million more in the Rate Support Grant than was at first thought. An immediate embargo on filling vacancies among staff was ordered by Chief Executive John Stevenson as soon as news of the possible £9.7 million, cut reached him.

Members left the figure open-ended, though the retiring president, Mr. J. Saunders, and the vice-chairman, Mr. John Roberts, have both, with some support, indicated that it should be not less than £1,000. Unanimously, the meeting felt that the show, one of the finest of its kind in the country, bringing publicity to the town and district and exhibitors and visitors from far afield, deserved greater support from industrial firms, traders and local organisations not only for way of guarantees against the possibility of loss of a day of the attendance slumped, but by way of donations and sponsorship.

Risk of a surgeon slams team

THE NATIONAL Health Service is riddled with frustration and bad management. The bitter diagnosis of the service and its inability to function in the patients' interests came in a scathing attack by Princess Risborough surgeon, Mr. J. D. Cooper.

Mr. Cooper, a consultant at hospitals in Thame and Watlington is due to retire at the end of the year and this week he said he was "Jolly glad to be getting out."

And he warned that the situation was getting worse and was already rebounding on thousands of patients.

High quality foam is used for the loose seat cushions and natural kapok for the back cushioning.
